TESTIMONIAL FOR WEBTECHNIK

1 WebTechnik were recommended to me when I was looking for a local organisation to take on the maintenance and development of my website www.sheffield-made.com

2 Since 2003 they have carried out a range of work from maintenance to redevelopment of the site. I have been very happy with the standard of service they provide and the quality of the work they have undertaken. What impressed me was the willingness of the personnel to give freely of their time to advise on technical and practical issues with my website. During a major overhaul of the site I had regular access to their offices to discuss in person the decisions needed regarding colour scheme, layout etc. The end result was a site of which I am proud and which is performing well. Customers often remark on the pleasing appearance of the site and its ease of navigation etc.

3 Because of my positive experience with WebTechnik I engaged them again for a second website, a joint venture between myself and a local manufacturer. I received a competitive quotation for the work and WebTechnik were able to secure funding from Business Link to assist towards the cost of the new site. The site was built within the agreed timetable and since going live has performed very well. Again, when I have had queries on the technical operation of the site WebTechnik have always been available promptly to provide their guidance and support. By the same token I have always been clear about their expectations of me in terms of providing copy, images etc at the right times to allow the project to complete.

4 WebTechnik have provided a professional service to me representing excellent value for money. I have recommended them to friends and will continue to do so.
